## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-14 are allowed.
2. The following is an examiner's statement of reasons for allowance: none of the prior art of record are considered to teach, suggest or render obvious the invention of claims 1-14.

Claim 1 recites an electrolyte for a battery, said electrolyte comprising: a non-aqueous solvent; and a salt mixture, said salt mixture comprising an alkali metal electrolyte salt and ,an additive salt combination comprising a first additive sale having a first additive anion of bis(oxolato) borate and a second additive salt having a second additive anion of oxalyldifluoroborate.

While each element on it's own is known in the art, the prior art of record does not reasonably teach or suggest the combination of the two as recited in claim 1. Furthermore it is apparent from the specification and Applicant's declaration that the combination exhibits improved rate capability and low temperature performance compared to each additive provided on their own and not as a combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
